

European Quarry Landscapes Network

FIRST EUROPEAN MEETING OF TERRITORIES WITH QUARRY LANDSCAPES

Seminar, 30-31 October, 2014
Gran Hotel Botánicos, Teruel, Aragon, Spain

This is the inaugural meeting of the new European Quarry Landscapes Network, dedicated to international cooperation in the care of historic stone quarries. In the setting of the impressive clay quarries of the spectacular Mudejar architecture of the city of Teruel, twelve international specialists will present varied perspectives on the historic European landscapes created by stone quarrying.

Aspects to be examined include their study, interpretation, valorisation, conservation, protection, and re-use, as well as how their cultural and natural qualities can be compatible with music and theatre, tourism, education, sports and leisure.

A new report prepared by The International Committee for the Conservation of the Industrial Heritage, TICCIH, will propose criteria by which quarries can be considered as World Heritage sites, leading to a consensus which can guide future inscriptions on the UNESCO list.

On the second morning delegates will visit the Mudejar architecture and examine the quarries from which were made their bricks and ceramic decoration.

In the final session representatives of territories with quarry landscapes and interested institutions will sign an agreement to constitute the EQLN and consider its development and program.

The presentations are in English.

Accommodation

The meeting will be held in the Gran Hotel Botánicos

Camino de la Estación, 27
44001 - Teruel
Comunidad de Teruel

Telephone: 978 62 39 57 - 630 01 70 67

<http://www.granhotelbotanicos.com/>

Reservations: reservas@granhotelbotanicos.com

Other accommodation can be found through the Teruel web site:
<http://www.turismo.teruel.es>

Inscription

To attend the meeting, please write with your details to the Project Coordinator, quarriesnetwork@gmail.com
Participation is free and includes refreshments and the conference tour.
